Driving licence (B)

Currently a second-year student in the engineering cycle at EFREI Paris, I study engineering through in-depth teaching in mathematics, physics and computer science. My work-study placement at the French Ministry of the Armed Forces keeps building my skills in a technical and demanding environment, where I am learning to handle sensitive data. My studies keep bringing me new technical skills through a multidisciplinary approach. I also have the opportunity to sharpen my critical thinking through varied analyses and to develop my communication skills; I am reliable and adapt easily.

EDUCATION

ENGINEERING CYCLE - EFREI PARIS

Ranked 1st engineering school in computer science (L'Étudiant, 2024). Integrated preparatory years 2023-2025, engineering cycle 2025-2028.

FRENCH BACCALAUREATE - SAINT FRANÇOIS DE SALES, TROYES

With honours (mention bien), majors in mathematics and computer science. 2023.

SKILLS

HARD SKILLS

- Python
- Java
- Scala
- C
- Matlab
- MySQL
- Postman
- Qlik Sense
- Talend
- PowerBI

SOFT SKILLS

- 5S method
- Agile methods
- Teamwork
- Autonomy
- Communication

LANGUAGES

- French: native language
- English: B2 (Cambridge FCE certificate)
- Spanish: B1

ACTIVITIES

- Dance teacher
- Boxing
- Oenology

EXPERIENCE

DATA ANALYST - WORK-STUDY

French Ministry of the Armed Forces | 2025 - present

- Data mapping, data lineage
- ETL flow design (Talend)
- ETL and Qlik Sense dashboard development
- API creation and integration
- Building strategic dashboards

SALES INTERNSHIP

Granja 3 | February 2025

Welcoming, advising and assisting customers; stock and shelf management.

SHOP-FLOOR INTERNSHIP

Lacoste | July 2024

Worked in a dyeing plant and in quality control. Work was organised around the 5S method to optimise both the workspace and team communication.

FARM WORKER

Ferme du Val St Jean, Montsuzain | 2022-2023

OBSERVATION INTERNSHIP

Mc Arthur Glen Troyes | February 2020

Observation internship in the marketing department of the Mc Arthur Glen Troyes centre.

ACADEMIC AND PERSONAL PROJECTS

Chatbot

Generates replies by analysing a TF-IDF matrix.

RoverRun

A C program that optimises a vehicle's movements, using data structures and optimisation algorithms.

ML Consumption

Machine learning project predicting electricity consumption by region from various parameters.

ML C-MAPSS

Machine learning project on the C-MAPSS dataset: a complete study of turbofans, from classification to prediction.

Audit app

An audit app built on a normalised model and complex SQL queries.

Messaging

Instant messaging app enabling communication across multiple devices.
